

CULTURAL EXTENSIONS : GEOGRAPHY

With the Geography materials, the child is given the facts of his physical world, provides him with intellectual exploration and development, and the understanding that he shares the planet with other people and cultures.

Globe of Land and Water

With these globes, the child gets a sensorial impression of land and water. The globe on the left has specific colors for specific continents.

The globe on the right has a sand surface representing land and a smooth surface representing water.

Puzzle Map of the World Parts & Puzzle Map of North America

Through sensorial activities with the Puzzle maps, children begin to build their knowledge of world geography.

These forms help children visualize and familiarize themselves to different types of land and water forms. Children learn the proper names for various land and water forms and are able to discriminate between them.

Other Geography Activities Include:

- The Earth
- Timeline of life on Earth
- Identification of major land and water forms around the world: oceans, seas, lakes, rivers, volcanoes, mountains and islands
- Physical, cultural, economic and political geography
- Flag Studies
- Geology
